 100 S. Main Street
 Los Angeles, CA 90012

**BIGGS CARDOSA
ASSOCIATES INC**
STRUCTURAL ENGINEERS

Biggs Cardosa Associates, Inc. (BCA) is a California corporation that was established in 1986. Structural engineering and project management services for multi-disciplinary projects are provided from our offices in Orange, Oakland, San Francisco, San Jose, and Fresno, California. We offer bridge engineering design and construction services to public agencies, professional engineers and architects on a wide variety of transportation-related projects. We specialize in the design, seismic retrofit, modification and rehabilitation of bridges for local

agencies and Caltrans.

Our firm is staffed with over 75 professional and technical personnel, which includes 14 registered Structural Engineers, 39 registered Civil Engineers, 8 Computer Drafters and 2 Inspectors. We design between 20 and 50 bridges each year, mostly for local agencies. Clearly, these statistics demonstrate that Biggs Cardosa Associates has one of the largest bridge engineering groups in the State of California, often many times the size of the bridge design staff of much larger, even national firms.

A wide range of capabilities allows us to be involved in all phases of project work, from the initial planning, feasibility studies, design plans and contract document preparation, through construction support and inspection services. Our key capabilities include:

- Project Management
- Structural Engineering
- Cost Estimates and Scheduling
- HBP Funding
- Bridge Inspections and Evaluations
- PSR, PA/ED and PS&E Preparation
- Construction Support & Inspection Services
